L.O. To division problems

## LOTTERY WINNERS WORKSHEET A

There is a lottery held in a town for five weeks.
Each week a top prize of $£ 1,440$ can be won.
However, every time the lottery is held, there is more than one winner so it has to be shared between them.

Calculate what share of the prize money every winner gets for each week.

| WEEK | NUMBER OF WINNERS |
| :---: | :---: |
| 1 | $4 \mathrm{~W} \\|$ NNERS! |
| 2 | $2 \mathrm{~W} \\| \mathrm{NNERS!}$ |
| 3 | $5 \mathrm{~W} \\|$ NNERS! |
| 4 | $3 \mathrm{~W} \\|$ NNERS! |
| 5 | $6 \mathrm{~W} \\|$ NNERS! |

## LOTTERY WINNERS WORKSHEET C

There is a lottery held in a town for six weeks.
Each week a top prize of $£ 5,765,760$ can be won.
However, every time the lottery is held, there is more than one winner so it has to be shared between them.

Calculate what share of the prize money every winner gets for each week.

| WEEK | NUMBER OF WINNERS |
| :---: | :---: |
| 1 | 4 WINNERS! |
| 2 | 2 WINNERS! |
| 3 | 6 WINNERS! |
| 4 | 9 WINNERS! |
| 5 | 3 WINNERS! |
| 6 | 8 WINNERS! |

Four large medals and five small medals fit exactly inside this box.

(Not actual size)

The diameter of a large medal is $\mathbf{1 6 . 2 5}$ centimetres.

Calculate the diameter of a small medal.
