L.O. To multiply mixed numbers

1. Complete the multiplications.

a) $3 \times 8\frac{2}{7} = \boxed{}$

d) $4 \times 6\frac{3}{19} = \boxed{}$

b) $2 \times 12\frac{2}{11} = \boxed{}$

e) $2\frac{2}{25} \times 12 = \boxed{}$

c) $6\frac{2}{11} \times 4 = \boxed{}$

f) $3\frac{1}{15} \times 8 = \boxed{}$

2. Complete the calculations.

a) $5 \times 2\frac{2}{3} = 10 + \frac{10}{3} = \boxed{}$

b) $4\frac{3}{7} \times 5 = 20 + \boxed{} = \boxed{}$

c) $8 \times 2\frac{5}{12} = \boxed{} + \boxed{} = \boxed{}$

d) $7 \times 3\frac{1}{5} = \boxed{} + \boxed{} = \boxed{}$

e) $4\frac{2}{9} \times 8 = \boxed{} + \boxed{} = \boxed{}$

f) $11 \times 4\frac{3}{10} = \boxed{} + \boxed{} = \boxed{}$

3.

$5 \times 3\frac{2}{11}$ is equal to

$3 \times 5\frac{2}{11}$
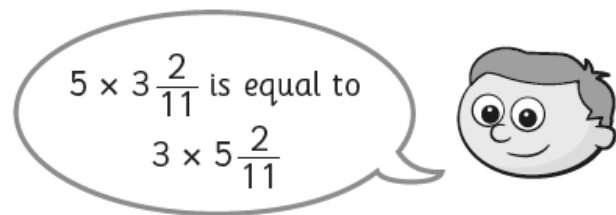

Do you agree with Ron? _____

Explain why.

_____

_____

4. One bag of potatoes weighs $1\frac{3}{4}$ kg.

How much do 5 bags of potatoes weigh?

5. Eva drinks $3\frac{1}{3}$ litres of water a day.

How many litres of water does she drink in a week?
