560	719	135	173	447	199
129	766	125	130	354	37

- ✓ Take it in turns to choose one number from Group A and one from Group B.
- ✓ Now work out the difference between the two numbers.
- ✓ If your answer appears on the grid, place a counter on that number.
- ✓ If the number is not there or already covered, you must miss a turn.
- ✓ The winner is the first person to have four counters in a row (in any direction).
