

Efficient subtraction

- I** a) Use the column method to work out $603 - 595$

	H	T	O
	6	0	3
-	5	9	5

a) Use the column method to work out $603 - 595$

	H	T	O
	6 ⁵	0 ¹⁰	¹³
-	5	9	5
			8

Did you get 8?

- I** **b)** Count on the number line to work out $603 - 595$

- I** **b)** Count on the number line to work out $603 - 595 = 8$
8 jumps

Which method do you prefer?

Which method is the most efficient? (needs the least work)

I b) Count on the number line to work out $603 - 595 = 8$

8 jumps

	H	T	O
	6 5	10 9	13
-	5	9	5
			8

The number line is the most efficient for **this** calculation because the numbers are so close together.

3

- b) Maisie is working out $800 - 237$.
She has used this column subtraction to find the answer.
Look closely. What do you notice?

	H	T	O
	7	9	9
-	2	3	7
	5	6	2

Then, she added 1 to the make the answer 563. $562 + 1 = 563$

Can you see what she's done?

3

- b) Maisie is working out $800 - 237$
She has used **799** instead of 800 to make an easier subtraction
with no exchanges.

	H	T	O
	7	9	9
-	2	3	7
	5	6	2

Then, she added **1** to the answer because $800 - 799 = 1$

$$562 + 1 = 563$$

So, $800 - 237 = 563$

- 3** **b)** Use Maisie's method to work out $900 - 253$

3

b) $900 - 253$.

Did you use 899 instead of 900?

	H	T	O
	8	9	9
-	2	5	3
	6	4	6

Then, added 1 to the answer?

$$646 + 1 = 647$$

Did you get 647?

5

A party shop has 2,009 balloons.

1,675 of the balloons are pink.

How many balloons are NOT pink?

Use a method where you subtract 10 from each number.

What numbers would you start with?

5

A party shop has 2,009 balloons.

1,675 of the balloons are pink.

How many balloons are NOT pink?

Use a method where you subtract 10 from each number.

What numbers would you start with?

Start with 1999 and 1665.

Write a column subtraction.

5

A party shop has 2,009 balloons.

1,675 of the balloons are pink.

How many balloons are NOT pink?

Use a method where you subtract 10 from each number.

$$1999 - 1665 = ?$$

Work out the column subtraction.

	Th	H	T	O
	1	9	9	9
-	1	6	6	5

5

A party shop has 2,009 balloons.

1,675 of the balloons are pink.

How many balloons are NOT pink?

Use a method where you subtract 10 from each number.

Did you get 334?

What do we need to do now?

	Th	H	T	O
	1	9	9	9
-	1	6	6	5
		3	3	4

5 A party shop has 2,009 balloons.

1,675 of the balloons are pink.

How many balloons are NOT pink?

Use a method where you subtract 10 from each number.

Because we subtracted 10 from both Numbers, we don't need to do anything else!

So, $2,009 - 1675 = 334$

	Th	H	T	O
	1	9	9	9
-	1	6	6	5
		3	3	4
