

Challenge 1:

Complete the addition pyramid. The block above each pair of blocks is the total of the numbers below it.

Challenge 2:

Each digit is different. These three numbers have a total of 10. What could they be? Find 3 possible solutions.

	?	+	?	
	?	+	?	?
+	?	+	?	?

+			

+			

+			

What do you notice about the digits you have used in your different solutions?
