Greenpeace

Greenpeace wants to make a greener, healthier and more peaceful planet, where people and animals can live happily together.

Greenpeace began in 1971 when a small group of people sailed a boat to the Pacific Ocean because they wanted to protect the environment.

Greenpeace is working in over 40 countries around the world. Millions of people around the world are part of Greenpeace, all working together to protect our planet.

They campaign on topics which are most important in the world:

- › Protecting our oceans
- › Protecting our forests
- › Stopping climate change
- › Ending plastic pollution
