PIRATE TREASURE!

The seven crew members of a pirate ship found a treasure chest containing 144,576 gold coins on a desert island in the Pacific Ocean.

Captain Calamity got a third of the gold coins.

Toothless Tom got a quarter of the gold coins.

Ruthless Ruby got a sixth of the gold coins.

Jumping Jack got an eighth of the gold coins.

The other three pirates, Horrible Hanna, Peg-Leg and Smiffy, shared equally what was left over.

How many gold coins did each pirate get?

SUPER EVIL QUESTION!

Can you work out what fraction of the total each of the last three pirates got?
