

Wolves

Wolves live in family groups called packs. They work together to hunt, look after pups and protect their land.

Wolves howl, whimper and whine, growl and bark, yelp and snarl. A pack of howling wolves can be heard from 10 miles away.

Grey wolves live in Asia and North America. Wolves used to live in Britain but they were all killed by hunters hundreds of years ago.

They have sharp teeth, strong bodies, and excellent senses which help make them good hunters. They are carnivores and eat big animals like deer and moose.
